Customer Journey Map — *AI Financial Advisor*

Rahul, 28 · Working Professional · Rs.70k/month

PHASE	Discover	Enter	Engage	Deepen	Extend
	How does Rahul first learn about the AI Financial Advisor?	What does Rahul experience as he begins using the app?	The core moments — analysis, advice & planning	Rahul explores goal planning, charts & chatbot	What happens after the session? Returning & sharing
Steps *What does the person typically experience at each step?*	Googles "AI budgeting tool India" Sees recommendation on Twitter / LinkedIn Reads a brief description of the app Runs `streamlit run app.py` locally	Lands on hero screen with welcome message Reads the About Tool section Opens sidebar and selects profile type Enters income, expenses, debts & savings Types goals, selects risk tolerance	Clicks "Financial Analysis & Advice" Sees spinner — API processing Views 4 metric cards (savings, net worth, DTI) Reads progress bars (savings rate, debt load) Opens "Financial Advice" tab Reads 6 section cards with personalised advice	Clicks "Visualizations" tab — views 4 charts Opens Goal Plan tab, enters custom instruction Generates advanced goal plan Opens AI Chatbot tab Types "Should I invest in SIPs?" — reads answer	Screenshots advice sections for reference Shares app link with a colleague Returns next month with updated figures Tracks progress against goal plan milestones
Interactions *People, places & touchpoints at each step*	Social media posts / blog articles GitHub README / documentation Peer word-of-mouth referral	Streamlit sidebar form fields About Tool section (hero screen) selectbox, number_input, text_area widgets	"Financial Analysis & Advice" button st.metric() cards & progress bars Section cards (violet-bordered) Gemini API (cloud, invisible to user)	4 Matplotlib / Seaborn charts Goal plan text area + generate button Chat text area + Send Message button Chat history bubble display	Screenshot / export (manual) App URL / share link Personal finance spreadsheet (external)
Goals & Motivations *"Help me find..." or "Help me avoid..."*	Help me find a simple financial planning tool Help me avoid complex finance apps Help me understand if AI can replace a financial advisor	Help me set up my profile quickly Help me avoid confusing input forms Help me trust the app with my financial data	Help me understand where my money is going Help me find out if my debt level is dangerous Help me get a clear, actionable savings plan	Help me visualise my financial health Help me build a debt-free goal plan Help me get quick answers without a human advisor	Help me track my financial progress monthly Help me share this tool with people who need it Help me stay accountable to my goals

PHASE	Discover	Enter	Engage	Deepen	Extend
	How does Rahul first learn about the AI Financial Advisor?	What does Rahul experience as he begins using the app?	The core moments — analysis, advice & planning	Rahul explores goal planning, charts & chatbot	What happens after the session? Returning & sharing
Positive Moments *Steps that feel enjoyable, motivating or delightful*	Impressed it works with just a browser & Python Excited by "AI-powered" financial guidance	Sidebar is clean and easy to fill in About Tool section builds confidence Profile-specific income fields feel personal	Advice sections are clear and jargon-free Seeing net worth calculated instantly is satisfying High debt alert helps Rahul take action	Charts make financial data easy to grasp Goal plan with exact Rs. amounts feels actionable Chatbot answers feel personalised, not generic	Sharing the app feels helpful and effortless Returning next month shows measurable progress
Negative Moments *Steps that feel frustrating, confusing or costly*	Installing Python & dependencies feels technical No cloud-hosted demo link available	Unsure what "risk tolerance" means at first Goals free-text field needs clearer instructions	2–5 second wait for Gemini API feels long Advice sections can be long to read No ability to export advice as PDF	Goal plan requires manual instruction entry Chatbot resets on page refresh (no persistence) Charts can't be downloaded easily	No notification / reminder to return next month No account — progress not saved across sessions
Emotion *How does Rahul feel at each phase?*	Curious	Comfortable	Surprised & Informed	Empowered	Loyal & Sharing
Areas of Opportunity *How can we improve each step?*	Add a hosted Streamlit Cloud demo link Create a 1-click install script Add a YouTube walkthrough video	Add tooltip explanations for "risk tolerance" & "DTI" Add goal suggestion chips (e.g. "Buy a House") Show a sample pre-filled profile on first load	Add streaming Gemini response for faster feel Add "Export as PDF" button for advice sections Add one-line summary card above detailed advice	Allow chart download as PNG Add suggested goal instructions as quick-select chips Persist chat history using Streamlit session across reruns	Add monthly email reminder / re-analysis prompt Add user account / login for persistent history Add progress comparison vs last session
